*When you get right down to it,
food is practically the whole story every time.*

—Kurt Vonnegut, Galápagos

CONTENTS

PREFACE: WHY IS NUTRITION CONFUSING, AND WHAT CAN BE DONE ABOUT IT?	XV
ACKNOWLEDGMENTS	XIX

Part I Why What We Eat Matters: Farm to Fork

1 Framing Today's Food and Nutrition Issues	3
--	----------

<i>What's this book about?</i>	3
<i>Who should read this book? Is a science background necessary?</i>	4
<i>How do traditional and contemporary diets differ around the world?</i>	8
<i>Who runs the food system?</i>	12
<i>Who produces and provides our food?</i>	15
<i>What are the major food and nutrition challenges impacting human and environmental health?</i>	17
<i>How can we solve food and nutrition problems? Revolution, or evolution?</i>	19

2 Global Food and Nutrition Challenges: People and Planet	22
--	-----------

<i>Who is affected by hunger, food insecurity, and malnutrition?</i>	22
<i>What is obesity, and why is it a health problem?</i>	24

<i>Who suffers from chronic diseases, and what are the leading causes of death globally?</i>	25
<i>What are the causes of food poisoning, and how can it be reduced?</i>	27
<i>How do agriculture and food production contribute to climate change?</i>	29
<i>Are fertilizers farming friend or foe?</i>	31
<i>What's the problem with pesticides?</i>	33
<i>What is agriculture's role in water pollution and dead zones?</i>	37
<i>What is the state of seafood, and why does overfishing matter?</i>	38
<i>What are the causes and impacts of food waste?</i>	40

Part II Dining Throughout Human History: Science, Technology, Eater, Environment

3 How Revolutions, Discoveries, and Inventions Shape Our Diet: Paleo to Present 45

<i>What is the Paleolithic diet? What did hunter–gatherers actually eat?</i>	45
<i>What is the Neolithic Revolution, and how did diets change after the birth of agriculture?</i>	47
<i>How and why did the Industrial Revolution impact food production?</i>	49
<i>What is the Green Revolution, and how did it impact human health and the environment?</i>	50
<i>What is the Genetic Revolution, and how did it affect food production?</i>	51
<i>How have the Digital Revolution and Information Age impacted our diet?</i>	52
<i>What are the top food inventions and technologies that have shaped how we eat and drink throughout human history?</i>	54

4 Contemporary Food Production, Buzzwords, and Pop Nutrition: Fact or Fiction? 56

<i>What are “processed” foods, and how do they fit into a healthy diet?</i>	56
<i>Do red and processed meats cause cancer?</i>	60
<i>Are canned and frozen foods inferior to fresh?</i>	61
<i>Are “natural,” “raw,” and “clean eating” concepts science, or nonsense?</i>	64

<i>What's the difference between "organic" and "conventional"?</i>	66
<i>Is "eating local" important for human health and the environment?</i>	70
<i>OMG GMO!? Why is food genetically engineered?</i>	72
<i>Is "grass-fed" beef healthier and more sustainable than "grain-fed"?</i>	74
<i>How does "wild-caught" salmon compare to "farmed"?</i>	75
<i>Is sugar addictive?</i>	77
<i>What are "good bacteria," and how are they related to "probiotics," "prebiotics," and the "microbiome"?</i>	78
<i>Why is breastfeeding important?</i>	80
<i>How does infant formula compare to breast milk?</i>	83

5 Diets and Food Environments Today: Why We Eat the Way We Do **85**

<i>What are the influencers and major drivers of eating behavior and food choices in today's world?</i>	85
<i>What exactly is taste, and why does it differ across person and place?</i>	86
<i>How does the foodscape shape how we eat?</i>	89
<i>Does food advertising impact diet?</i>	90
<i>How have cooking and dining changed in the 21st century?</i>	91
<i>Does snacking or meal timing matter?</i>	94
<i>How do restaurants, cafeterias, and other "away-from-home" options impact diet?</i>	95
<i>What roles do street food and food trucks play?</i>	97

Part III Essential Food and Nutrition: Separating Science from Junk Science

6 A Brief History of Nutrition: Scientific Discoveries and Applications **101**

<i>How do we know what we know about food and health?</i>	101
<i>How did the study of food become the science of nutrition?</i>	102

<i>What is nutrification? What is fortification?</i>	104
<i>What other methods are used to nutritify foods?</i>	107

7 Small and Mighty: Vitamins, Minerals, and Phytonutrients **109**

<i>What are vitamins?</i>	109
<i>What's the deal with vitamin D?</i>	110
<i>How do you know whether your vitamin intake is adequate? Should you take a supplement?</i>	111
<i>What roles do salt and other minerals play in our diet, and should you watch your sodium intake? What is the DASH diet?</i>	112
<i>What are phytochemicals?</i>	114
<i>Do carotenoids prevent cancer?</i>	115

8 The Foundation of Nutrition: Carbohydrate, Fat, and Protein **117**

<i>What are the different kinds of carbohydrates we eat?</i>	117
<i>What is fiber, and how is it related to health?</i>	119
<i>Are you eating the best carbs for your body? How do digestible carbohydrates, sugar, and high-fructose corn syrup differ?</i>	120
<i>What are the major fats and oils in our diet?</i>	122
<i>How does saturated fat compare to unsaturated fat?</i>	123
<i>Is coconut oil a good choice? What about palm oil?</i>	124
<i>What are omega-3 and omega-6 fatty acids?</i>	126
<i>What is trans fat?</i>	128
<i>Is fat "fattening"? Are low-fat foods healthy?</i>	129
<i>Why are protein and amino acids important?</i>	130
<i>How much protein do we require, and do some people need more than others?</i>	133

<i>Do high-protein diets lead to greater weight loss and improved cardiovascular health?</i>	136
--	-----

Part IV Food, Glorious Food

9 Creating a Colorful Plate: Vegetables and Fruits 139

<i>How do vegetables differ nutritionally?</i>	139
<i>What's special about herbs and spices?</i>	141
<i>What are the various kinds of fruit?</i>	142
<i>When it comes to disease prevention, are some vegetables and fruits better than others?</i>	144
<i>How much vegetables and fruit are we eating, and why should we consume more, of all kinds?</i>	146

10 Whole Grains, Refined Grains, and Gluten 150

<i>What are cereal grains and "pseudograins"?</i>	150
<i>What's the difference between "whole" and "refined" grains?</i>	151
<i>What is gluten, and are gluten-free diets important for health?</i>	152
<i>Do whole and refined grains differently impact the body?</i>	154
<i>How do you ensure grains are "whole"?</i>	155

11 Plant Protein Power: Beans and Peas, Legumes and Pulses, Nuts and Seeds 157

<i>What are legumes, and why are they unique in nutrition and agriculture?</i>	157
<i>How do legumes impact weight and health?</i>	158
<i>Why do beans produce gas (and can it be mitigated)?</i>	159
<i>Why is soy unique and how is it related to health?</i>	160
<i>What's in a nut?</i>	162
<i>Are nuts fattening, or associated with increased risk of disease?</i>	163
<i>What's the current science on nut allergies and prevention?</i>	163

12 Land Animals and Animal-Based Foods **165**

<i>What animals are consumed for food, and how do they differ nutritionally?</i>	165
<i>What resources are needed for animal production?</i>	168
<i>What is a concentrated animal feeding operation (CAFO), and why does it matter?</i>	170
<i>Why are antibiotics used in CAFOs, and is it important for human health?</i>	172
<i>Why are hormones used in animal production?</i>	174
<i>Who drinks milk, and what does it offer nutritionally?</i>	175
<i>Are milk and its nutrients related to bone health and osteoporosis?</i>	176
<i>Are milk and dairy products related to obesity, prostate cancer, and other diseases?</i>	177
<i>Why is yogurt unusual?</i>	179
<i>Are egg-white omelets the best choice for heart disease prevention?</i>	181
<i>Are some eggs healthier and more sustainable than others?</i>	183

13 Water Dwellers: Fish and Seafood **186**

<i>What are the nutritional benefits of seafood?</i>	186
<i>Does seafood prevent heart disease? What about “fish oil”?</i>	187
<i>What is the state of environmental contamination? Is seafood safe to eat?</i>	189
<i>Is seafood healthy for pregnant and breastfeeding women and young children?</i>	190
<i>What are the benefits and risks of aquaculture?</i>	192

14 Water, Coffee, and Tea: Impacts on Health and Environment **196**

<i>Why is water essential for life, and how much do we need?</i>	196
<i>What are the differences between tap and bottled water?</i>	198
<i>Can drinking water help with weight loss, or prevent kidney stones?</i>	200
<i>How are coffee and caffeine unique?</i>	200
<i>How is coffee related to heart health and type 2 diabetes?</i>	202

<i>Is coffee beneficial for other diseases, like depression?</i>	203
<i>What's behind coffee production?</i>	204
<i>What are the main types of tea? What is kombucha?</i>	205
<i>What are tea's nutritional and health benefits—and how is green tea distinctive?</i>	207
15 Alcohol and Health: Cheers!?	210
<i>How is alcohol handled in the body?</i>	210
<i>How do wine, beer, spirits, and cocktails differ in calorie and nutrient content?</i>	211
<i>What are the health risks and benefits of alcohol consumption?</i>	212
<i>Does red wine play a special role in heart disease prevention?</i>	215
16 Sweet Drinks: Fruit Juice, Sugar-Sweetened Beverages, and Diet Soda (Pop)	217
<i>How many sugar-sweetened beverages are we drinking, and are they related to obesity?</i>	217
<i>Is drinking fruit juice the same as eating whole fruit?</i>	219
<i>Is fruit juice a nutritious beverage or a risk factor for obesity, type 2 diabetes, and cavities? And is juicing healthy or hokey?</i>	220
<i>Are diet beverages helpful for weight control?</i>	221
Part V Diets for Optimal Health, Longevity, and Sustainability: Today and Tomorrow	
17 Putting It All Together: Creating a Health-Giving Diet that Works for You, for Life	227
<i>Is focusing on individual nutrients and foods important for health?</i>	227
<i>Are there universal dietary principles for preventing chronic disease?</i>	228
<i>Is a calorie just a calorie? What mix of fat, carbs, and protein is most effective for weight management?</i>	230

<i>What popular diets are best for weight loss?</i>	233
<i>Do calorie restriction and fasting lead to a longer life and better health?</i>	234
<i>What are the keys to longevity? What are the “Blue Zones”?</i>	239
<i>What sustainable practices protect people and the planet?</i>	245
<i>Is dietary change possible?</i>	247

18 The Future of Food and Nutrition **250**

<i>How will we sustainably feed 10 billion people in 2050—and beyond?</i>	250
<i>How are high tech and big data changing farming?</i>	253
<i>Will food production move to cities?</i>	254
<i>Will genetic engineering of food continue?</i>	255
<i>Will animals still be raised for food?</i>	256
<i>Is “personalized nutrition” hope or hype?</i>	258
<i>What will dinner look like?</i>	259
<i>How will machines change how we cook and eat?</i>	260
<i>What does food evolution look like?</i>	261
